BRIJESH BARAL

Cybersecurity Analyst | SOC Monitoring | VAPT
Bengaluru, India | +91 7017078095 | brjshbrl1411@gmail.com | linkedin.com/in/brjsh-brl1411 | github.com/brjshbrl | brjshbrl.github.io

PROFESSIONAL SUMMARY

Cybersecurity graduate (B.Tech CSE, Cybersecurity) with hands-on SOC, SIEM and VAPT experience from an internship, a network administration role and self-built labs. Detected 2 simulated attack types mapped to 3 MITRE ATT&CK techniques in a Wazuh SIEM lab, assessed 10+ systems and web applications with Nmap, Burp Suite and OWASP ZAP, and built a simulated ISO 27001 GRC portfolio project. Holds 3 certifications: CEH, CND and ISC2 CC. Targeting SOC Analyst (L1), VAPT and Web Security roles; available for immediate joining.

TECHNICAL SKILLS

Security Operations: SIEM (Wazuh, Splunk), Log Analysis, Threat Detection & Hunting, Alert Triage, Incident Response
Vulnerability & Pen Testing: VAPT, OWASP Top 10, Nmap, Burp Suite, Metasploit, OWASP ZAP, Wireshark, Kali Linux
Frameworks: MITRE ATT&CK, NIST Cybersecurity Framework
GRC: ISO/IEC 27001:2022, Risk Assessment, Statement of Applicability, Internal Audit
Networking: TCP/IP, DNS, DHCP, VLAN, Firewalls, Endpoint Security
Scripting: Python (security automation)

WORK EXPERIENCE

Junior Network Administrator, *Sunshine Industries, Chennai* Jan 2025 – Jun 2025
Tech: VLAN, DHCP, DNS, TCP/IP, routers, switches

- Configured and maintained VLAN, DHCP and DNS services for 50+ endpoints, keeping the network stable and secure.
- Troubleshot and resolved 20+ connectivity issues per month (over 6 months) across routers, switches and endpoints.
- Monitored network performance and traffic patterns, flagged anomalies to senior IT staff for escalation, and documented incidents and fixes.

Cyber Security Intern, *Futurense Technologies, Bengaluru* Jun 2024 – Oct 2024
Tech: Nmap, Burp Suite, Wireshark

- Conducted VAPT on 10+ systems and web applications in a 5-month internship using Nmap, Burp Suite and Wireshark, uncovering 15+ medium/high-risk vulnerabilities.
- Triaged security alerts and escalated suspicious activity to senior staff with documented findings and resolutions.
- Supported security audits and helped keep security documentation accurate.

PROJECTS

SOC Home Lab – Attack Detection & SIEM Analysis GitHub
Tech: Wazuh 4.9.0, VMware Fusion, Windows 11, Kali Linux, Windows Event Logs, PowerShell, SMB, MITRE ATT&CK

- Built an isolated SOC lab with a Wazuh SIEM, Windows 11 and Kali Linux VMs to simulate attacks and practise detection and response.
- Detected 2 attack types, SMB brute-force and obfuscated PowerShell execution, through Windows Event Log analysis and mapped them to 3 MITRE ATT&CK techniques (T1110.001, T1059.001, T1027).
- Documented the full attack chain, detections, analyst notes and response recommendations in a public GitHub repository.

ISO 27001 ISMS Implementation (Simulated GRC Project) GitHub
Tech: ISO/IEC 27001:2022, Risk Register, Statement of Applicability, Excel, Markdown, GitHub

- Built a simulated ISMS for a fictional 50-person FinTech: 20-asset inventory with C/I/A scoring, 18-risk register (5×5 methodology) with residual risk, and treatment plan.
- Mapped risks to Annex A controls and produced a 93-control Statement of Applicability, 7 policies, a gap assessment, a mock internal audit (4 findings) and a corrective action plan.

Vulnerability Assessment Automation GitHub
Tech: Python, OWASP ZAP, CSV, Matplotlib

- Automated web vulnerability scanning with OWASP ZAP and Python (spidering and active scan), cutting manual scanning and reporting effort by ~40%, with CSV export and Matplotlib risk reporting.

NetShield – MFA Authentication System
Tech: Python, PyUSB, face recognition

- Built a two-factor authentication system in Python combining real-time face detection with USB-device verification (PyUSB).

EDUCATION

B.Tech, Computer Science & Engineering (Cybersecurity), *Jain (Deemed-to-be University), Bengaluru* CGPA: 7.0 | 2025
Diploma, Computer Science, *Swami Darshanand Institute of Management & Technology, Roorkee* CGPA: 7.0 | 2022

CERTIFICATIONS

- Certified Ethical Hacker (CEH) and Certified Network Defender (CND), EC-Council; Certified in Cybersecurity (CC), ISC2
- IBM Penetration Testing & Threat Hunting; OSForensics Triage (Passmark); Cisco Networking Academy (Network Defense, SOC Operations)
- Apponix Academy, Cybersecurity & Ethical Hacking Training (Apr–Jun 2025): 20+ hands-on labs
