

BRIJESH BARAL

Entry-Level Cyber Security Analyst | SOC Monitoring & VAPT

Pondicherry, India | +91 7017078095 | brjshbrl1411@gmail.com | linkedin.com/in/brjsh-brl1411 | github.com/brjshbrl

PROFESSIONAL SUMMARY

Entry-level cybersecurity professional with hands-on experience in vulnerability assessment, security monitoring, log analysis, and incident response support. Built a self-directed SOC home lab (Wazuh SIEM) detecting real attacks mapped to MITRE ATT&CK, fully documented on GitHub. Proficient with Nmap, Burp Suite, Wireshark, and Metasploit. CEH, CND, and ISC2 CC certified, with practical VAPT experience across web applications and network infrastructure. Skilled in Python for security automation. Based in Pondicherry and available for immediate joining.

EXPERIENCE

Junior Network Administrator

Jan 2025 – Jun 2025

Sunshine Industries · Chennai, India

- Administered VLAN, DHCP, and DNS configurations across 50+ endpoints, maintaining stable and secure network connectivity.
- Investigated and resolved 20+ network connectivity issues per month across routers, switches, and endpoints.
- Monitored network performance and traffic patterns, flagging anomalies for escalation to senior IT staff.
- Maintained network documentation including incident logs and resolution reports in line with standard IT practices.

Cyber Security Intern

Jun 2024 – Oct 2024

FutureSense Technologies · Bengaluru, India

- Performed VAPT on 10+ systems and web applications, identifying 15+ medium/high-risk vulnerabilities using Nmap, Burp Suite, and Wireshark.
- Monitored logs, triaged security alerts, and escalated suspicious activity findings to senior staff with documented resolutions.
- Assisted in security audits and contributed to maintaining accurate security documentation and incident reports.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, Specialisation in Cybersecurity

Jain (Deemed-to-be University), Bangalore — 2025

Diploma in Computer Science

Swami Darshanand Institute of Management & Technology, Roorkee — 2022

PROJECTS

SOC Home Lab – Attack Detection & SIEM Analysis (Wazuh)

- Built an isolated SOC lab (Wazuh 4.9.0, Windows 11/Kali VMs, VMware Fusion) simulating and detecting SMB brute-force (T1110.001) and obfuscated PowerShell execution (T1059.001, T1027) via Windows Event Log analysis.
- Documented full attack chain, Wazuh detection queries, analyst notes, and response recommendations. Repo: github.com/brjshbrl/soc-home-lab

Vulnerability Assessment Automation – OWASP ZAP (Python)

- Automated web vulnerability scanning with OWASP ZAP, cutting manual scanning and reporting effort by ~40%.
- Implemented spidering, active scan, and a CSV + Matplotlib reporting module for risk visualisation.

NetShield – MFA Authentication System

- Built a multi-factor authentication system combining facial recognition and USB-based access with real-time face detection and verification.

SKILLS

SIEM & Log Analysis: Wazuh (deployment, detection rules, threat hunting)

Vulnerability Assessment & Penetration Testing (VAPT) · Incident Response fundamentals

Security Frameworks: NIST Cybersecurity Framework · MITRE ATT&CK · OWASP Top 10

Tools: Nmap, Burp Suite, Wireshark, Metasploit, Kali Linux, OWASP ZAP, Splunk (working knowledge)

Networking: TCP/IP, DNS, DHCP, Firewall & Endpoint Security fundamentals

Programming: Python (security automation) · Cloud security fundamentals

CERTIFICATIONS & TRAINING

CEH – EC-Council (ECC9857603421) · CND – EC-Council (ECC7385926041) · Certified in Cybersecurity (CC) – ISC2

OSForensics Triage – Passmark · IBM Penetration Testing & Threat Hunting

Cybersecurity & Ethical Hacking Training – Apponix Academy, Bengaluru (Apr–Jun 2025): 20+ hands-on labs in vulnerability scanning, exploitation, and OWASP Top 10 methodology

Cisco Networking Academy: Network Defense, SOC Operations, Cyber Threat Management (+3 related courses)

Portfolio: brjshbrl.github.io
